

Smudge Casualty FX

"If it bleeds, we can build it"

Clinical Task Trainers

Wound Packing Trainer- £330 (inc VAT)

Two variants available;

The gunshot wound/ fragmentation wound

The stabbing/ gash wound

Made of almost 100% platinum silicone, altered during the manufacturing process to create lifelike skin and flesh-like feeling.

Included is the wound packer itself, in any desired skin tone, black rigid storage case, x2 removable (luer lock) silicone blood tubes, and a modified 2 litre garden hand pump.

Embedded Object Arm Trainer £330 (inc VAT)

Made from 100% platinum silicone. This clinical trainer allows for students/candidates to practice the safe securing and dressing of embedded objects.

Included objects; (all reproduced in resin)

- Rusty length of rebar
- Knife handle and knife blade

These objects are firmly slotted into position, with the ability to remove, clean and store within the included protective case
